

“ The Pure is a high quality, compact, well designed bit of kit with reliable data and powerful features. It's an excellent all-in-one driver aid for the speed-conscious. ”

Road Angel Pure Firmware 623 Release Notes. 04.02.19

Changes, Bug Fixes and Improvements (Pure Firmware 623)

1. The pure will have a 3 month free trial of our integration with the **UK Smart Motorway's**. This makes the Pure the only device of its kind with this technology. This means variable speed limit signs and cameras will reflect actual limits displayed (subject to DoT service and typically within 2 minutes of real time
2. 70mph dual carriageways where the carriageways are widely separated were being reported as 60mph, this has now been rectified.
3. January 2019 Road Speed Library (R.S.L)
4. Revised "Stolen" device Message
5. Improve robustness when Road Speed Library is updated
6. Fix for 5mph speed limit that was picked up from nearby trails with no car access
7. Add Smart motorway to Unit Data
8. New "boot up" screen
9. Removal of grey map graphic, replace with "Pure" blue background
10. New "power down screen" for user shut down (Bigger & Bolder Font) – **this will not be shown on automatic shutdown or overheat shutdown**
11. New "searching for satellites" screen
12. "New firmware" availability notice now needs dismissing by user.
